SUMMARY

Full Stack Developer with hands-on experience building responsive, user-centric web applications. Proficient in modern web technologies and AI-driven automation, including API integrations and chatbot systems. Adept at developing scalable, high-performance solutions for real-world applications.

INTERSHIPS

06/2025 – 07/2025	VINSUP INFOTECH <i>Full Stack Development</i> - Completed a 1-month Web Development Internship, gaining hands-on experience in both front-end and back-end technologies by building a full-stack project. - improving skills in responsive design, API integration, and real-world application development.
07/2025 – 08/2025	SKILLCRAFT TECHNOLOGY <i>Software Development Intern</i> Designing, developing, and maintaining applications using modern programming languages and frameworks, with a focus on building efficient, scalable, and user-friendly solutions.

TECHNICAL SKILLS

Frontend HTML5, CSS3, JavaScript React.js, Tailwind CSS Responsive Web Design Component-Based UI Development	AI & Automation n8n (AI workflows, chatbots, automation) Flowise OpenAI / Gemini / Claude API Integration Chatbot Development Workflow Automation Prompt Engineering
Backend Node.js REST APIs CRUD Operations API Integration	Tools Git, GitHub, Postman Llama for LLM VS Code Vercel , Netlify
Database Mongo DB Supabase Firebase PostgreSQL	

EDUCATION

2023 – 2027 Perambalur	B.Tech AI & Data Science <i>Dhanalakshmi Srinivasan Engineering College</i> CGPA: 7.8
2022 – 2023 Sivaganga	Higher Secondary - St. Justin Matric School <i>Percentage = 80 / 100</i> 77%

CERTIFICATIONS

- Python Programming | Full Stack Development | Cloud Computing (NPTEL) | SIH Hackathon 2025 .

PROJECTS

AI-Driven Healthcare Chatbot (SIH 2025 Finalist)

- Built an AI-powered healthcare chatbot for Smart India Hackathon 2025, providing symptom-based preliminary guidance and conversational health assistance; recognized as SIH 2025 Grand Finalist

Smart Healthcare Load Balancing & Emergency Response System

- **LifeSync** is a smart healthcare platform that uses real-time data and location tracking to recommend optimal hospitals, monitor availability, and support emergency services through an interactive dashboard and AI-powered features.

Student Leave Management System

- Developed a full-stack web application to manage student leave requests with role-based access, enabling submission, approval, and tracking of leave status.

AI Budget Management System

- The AI-Based Budget Management System tracks income and expenses in real time. It uses AI techniques to analyze spending patterns and provide insights. The system helps users make better financial decisions.

Car Spot (Vehicle Sales Platform)

- Smart Car Parking System lets users find and book parking instantly with real-time updates. It reduces traffic and saves time with a simple, efficient experience.

Daily Motivation Dashboard

- Daily Motivation Dashboard delivers personalized quotes, goals, and progress tracking in one clean interface. It keeps users focused, consistent, and motivated every day.

HACKATHONS

Smart India Hackathon (SIH) 2025 Grand Finalist

Participated in a national-level hackathon under Smart India Hackathon, collaborating with a team to build a real-world solution for the Government of Odisha. Gained hands-on experience in problem-solving, teamwork, and delivering impactful projects.

Hackathon -SRM Easwari Engineering College

Developed *LifeSync*, a smart healthcare system for real-time hospital allocation and emergency support. Collaborated in a 24-hour hackathon, gaining hands-on experience in full-stack development, teamwork, and rapid problem-solving.
